

Thanksgiving - St George's In Deed 2018

This fall season we are continuing to explore the ongoing journey of stewardship at St. George's. This year, we are looking at and thinking about stewardship as a sort of lifestyle - the way we live each day with gratitude and appreciation for the gifts we have received, rather than a traditional money-raising event. We are calling this approach ThanksLiving. The practice of ThanksLiving is how we live our lives as stewards of our days. It's about being connected to each other in community at St. George's and being connected and committed to be of service in the wider community and how we gift all of ourselves including our money.

This exploration will be focused on our stories as pilgrim people here at St. George's - what brought us to be part of the journey as stewards of Jesus way, God's ongoing plan. We will be considering ourselves and our stories of joining and enjoying our time here as stewards of our lives. We will see for the next 5 weeks in the slides, how some of our members see their lives as expressions of gratitude and praise, especially as they relate to this community.

This year we will be taking inventory of the riches we have and what we continue to receive. How can we grow into ThanksLiving with our actions and praise as we look toward the next steps in our journey together?
